

WEATHER FRONTS WORKSHEET / COLORING SHEET

I created this worksheet in order to provide a way for my kids to self- check www.TheWiseNest.com

their knowledge on the weather fronts and their symbols.

Cut out the flaps on the last page and glue them on the base page (There are two options for the base page. One for younger students and one for older students. Choose the one that suits your needs best). As the kids point to the symbol on each flap, they have to say which weather front it represents.

Younger students can use the coloring sheet and just color the pictures.

Older students can attempt to describe or give a short definition of each weather front.

Weather Fronts

glue front flap here

Cold Front

The forward edge of an advancing mass of cold air that pushes under a mass of warm air.

Warm Front

A front along which an advancing mass of warm air rises over a mass of cold air.

Stationary Front

A stationary front is a boundary between two different air masses, neither of which is strong enough to replace the other.

Occluded Front

The line or plane occurring where the cold front of a depression has overtaken the warm front, raising the warm sector from ground level. Also called occlusion .
